Career Objective

Seeking an opportunity in software engineering to apply my foundational knowledge, grow through practical experience, and contribute positively to the organization.

Education

Dayananda Sagar Academy of Technology and Management Bachelors of Engineering in Information Science & Engineering CGPA: 8.42	Bengaluru 2022 - 2026
Malnad PU College 12th grade Percentage: 87%	Shivamogga 2020 - 2022
Jnanadeepa Senior Secondary School 10th Grade Percentage: 78.4%	Shivamogga 2020

Technical Competencies

Programming Languages : Java (Basic), MySQL
Operating Systems : Windows, Linux

Projects

Smart Agro: Farming with Real-Time Insights-

Developed a ML and DL based web application to assist farmers with crop recommendation, yield prediction, crop price prediction, and fertilizer suggestion using soil and climate data.

Online Banking System-

Developed a Java and MySQL-based application for managing core banking operations like account handling and transactions.

Skin Disease Detection System-

Developed an AI & ML based powered system that analyzes skin images to detect and classify skin diseases. It aids in early diagnosis using deep learning techniques.

Object detection alarm using Arduino -

Designed an Arduino-based Object Detection Alarm using sensors to trigger alerts for proximity-based object detection.

Core Competencies

Analytical Thinking
Creative Thinking
Leadership Skills
Collaborative Teamwork

Coursework

Data Structures, OOPS, Operating Systems, Database Management System (DBMS)

Technical Training

Completed an internship as a Data Engineering Intern at DataPMI – developed a library management system using MySQL.
